

## Modrus Just One Inbox

Modrus 'Just One Inbox' (JOI) is a collection of Modrus services for small businesses that want to look after their own PCs but want Modrus to provide their IT infrastructure. Comprising a personal, unified messaging solution which brings together voicemail, email and fax – JOI provides superior call quality and powerful call answering / forwarding functionality, plus a comprehensive email and collaborative working environment.

### Superior Call Quality

Modrus partners with best-of-breed hardware and connectivity providers, to ensure maximum call bandwidth and clarity. Our systems are not crammed with hundreds of conversations (a practice called 'clipping'), meaning you get a crystal clear connection every time.

### Industry Standard Solution

Based upon the industry standard Microsoft Exchange® application, Modrus JOI provides comprehensive emailing facilities. The service features integrated anti-spam and anti-virus protection, plus access to shared calendars and files, with a generous 2GB of storage per mailbox.

### Numerous Accessibility Options

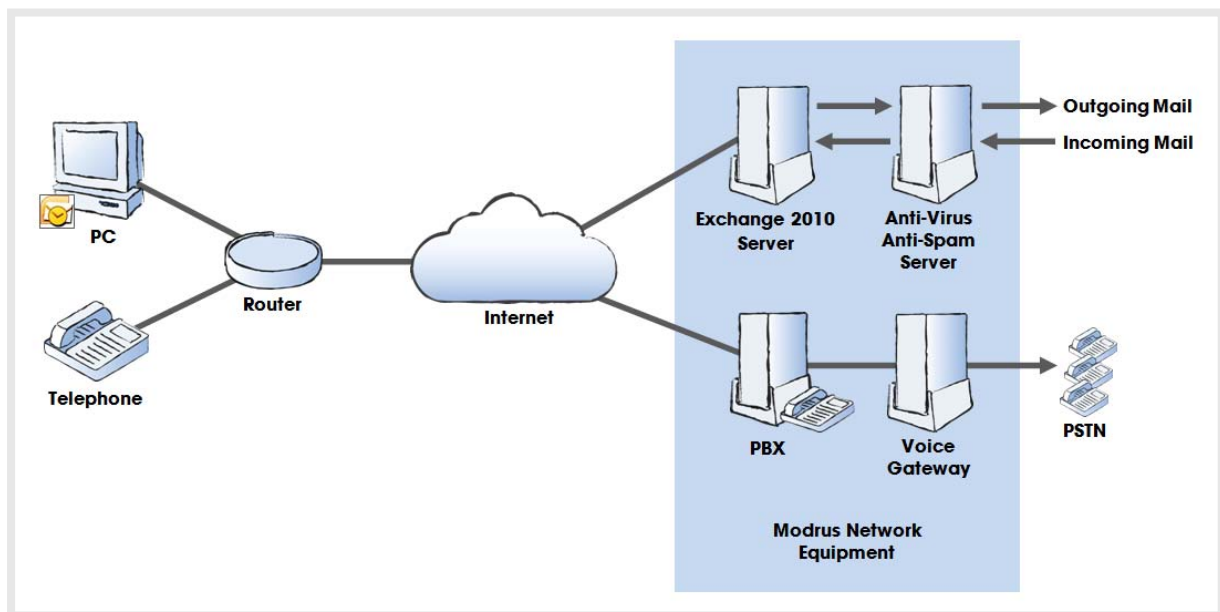

Modrus JOI can be accessed from desktop or laptop computers using Microsoft Outlook®, while Outlook Web Access® provides secure access from any Internet browser. In addition the service supports numerous mobile phones / PDAs including iPhone, Blackberry and those running Windows Mobile, all with full, automatic synchronisation.

\* The monthly fee includes a Microsoft Outlook license for each mailbox.

### Unbeatable System Uptime Guarantee

Modrus supplies all of the required system hardware and proactively monitors everything 24/7 from its sophisticated operations centre. On many occasions this means that if an issue occurs, it is rectified before you are even aware of it. Modrus is extremely confident of the processes in place and offers a cast-iron uptime guarantee. If your system is down, you don't pay for it – it's as simple as that.

## Modrus Just One Inbox

Comprising a personal, unified messaging solution which brings together voicemail, email and fax – JOI provides superior call quality and powerful call answering / forwarding functionality, plus a comprehensive email and collaborative working environment.
