

Modrus Hosted Telephony

Modrus Hosted Telephony systems provide superior call quality, powerful functionality and competitive pricing for workforces located in diverse geographical locations. In addition, because everything is monitored 24/7 from the Modrus operations centre, they come with unbeatable system uptime guarantees.

Superior Call Quality

Modrus partners with best-of-breed hardware and connectivity providers, to ensure maximum call bandwidth and clarity. Our systems are not crammed with hundreds of conversations (a practice called 'clipping'), meaning you get a crystal clear connection every time.

Powerful Functionality

Modrus supplies 3Com telephone systems which feature powerful functionality such as hunt groups for sharing departmental phone numbers, hundreds of hours of voicemail and detailed call reporting to measure staff performance. Additionally, telephone numbers from any UK dialling code can be supplied, allowing you to provide a local presence to your customers. You can even transfer your numbers to any geographical location if you decide to move offices.

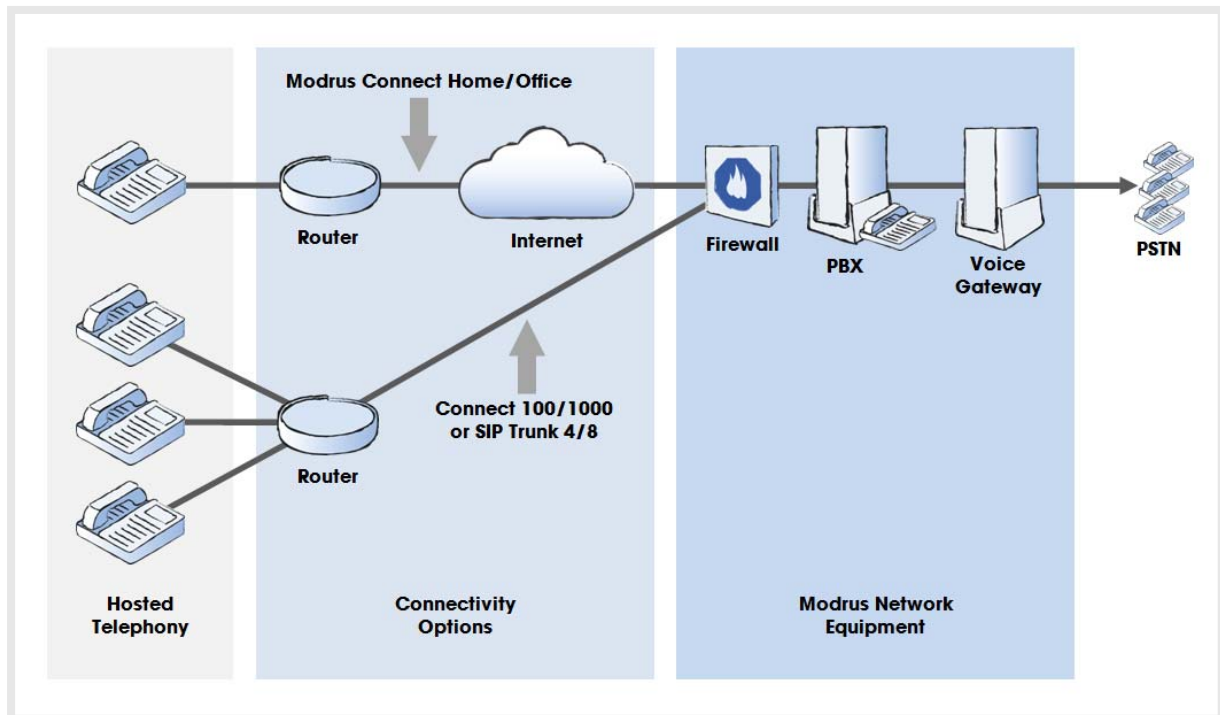

Competitive Pricing

Due to the volume of calls it manages, Modrus achieves significant economies of scale that are not available to individual organisations. These savings are passed on to you, in the form of significantly cheaper call costs and lower service rental charges.

Unbeatable System Uptime Guarantee

Modrus supplies all of the required system hardware and proactively monitors everything 24/7 from its sophisticated operations centre. On many occasions this means that if an issue occurs, it is rectified before you are even aware of it. Modrus is extremely confident of the processes in place and offers a cast-iron uptime guarantee. If your telephone system is down, you don't pay for it – it's as simple as that.

Modrus Hosted Telephony
