

Modrus Managed Exchange

Modrus Managed Exchange provides a comprehensive email and collaborative working environment. The service is delivered using hardware provided by Modrus located within your business, which is monitored 24/7 from its sophisticated operations centre. Modrus Managed Exchange is accessible from desktop & laptop computers, webmail and from a range of mobile phones including iPhone®, Blackberry® & those running Windows Mobile®.

Industry Standard Solution

Based upon the industry standard Microsoft Exchange® application, Modrus Managed Exchange provides comprehensive emailing facilities. The service features integrated anti-spam and anti-virus protection, plus access to shared calendars and files.

Numerous Accessibility Options

Modrus Managed Exchange can be accessed from desktop or laptop computers using Microsoft Outlook®, while Outlook Web Access® provides secure access from any Internet browser.

* The monthly fee includes a Microsoft Outlook license for each mailbox.

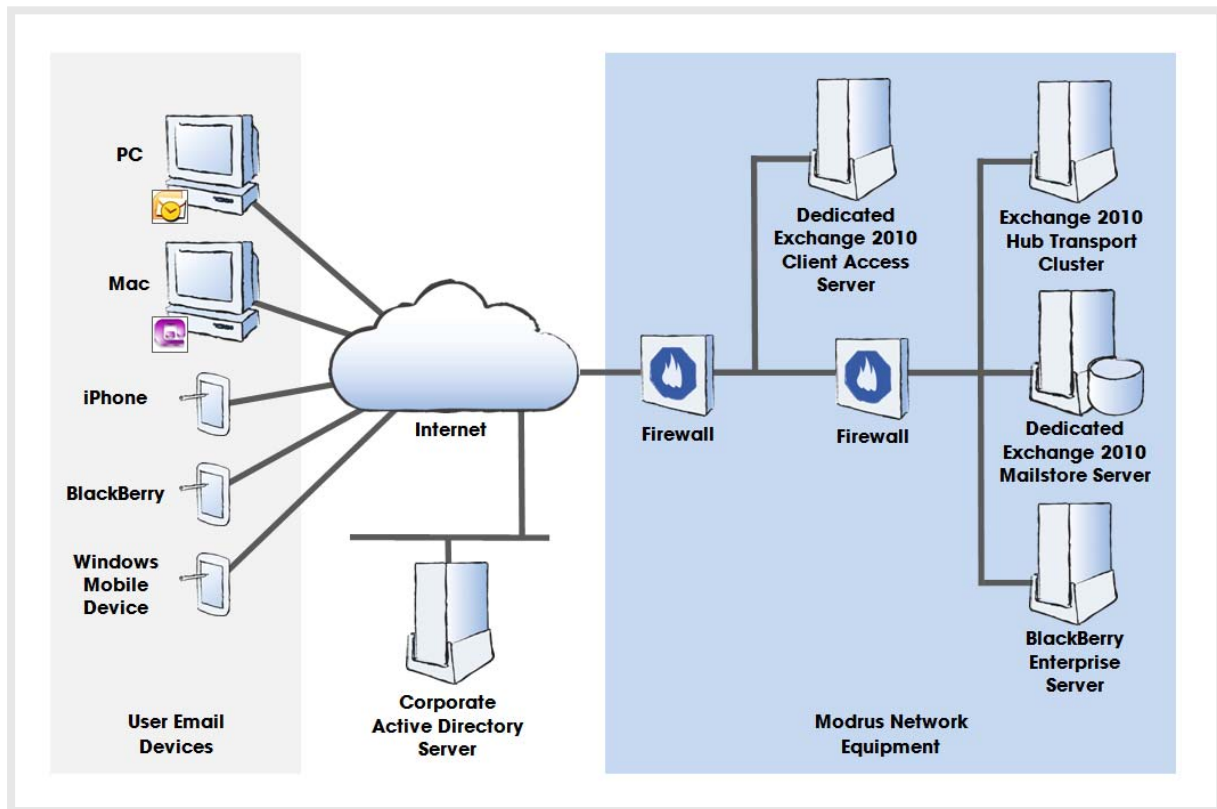

Clearly Defined Total Cost of Ownership

With a fixed, monthly, per mailbox tariff covering every aspect of the service, your expenditure is completely defined and visible from the outset. Modrus Managed Exchange replaces high hardware and software installation and maintenance costs with a flat fee, predefined, budgetary expenditure.

Corporate Level Support

Even with the right in-house technical staff, managing and maintaining an Exchange server effectively is a massive drain on resources. Modrus technicians are Exchange experts and ensure our service continues to provide the very best that Microsoft Exchange can offer. We provide all of the support that you would expect from an established IT department – but we offer better value service, have the benefit of a breadth of experience across thousands of users and will not go off sick or take holidays.

Modrus Managed Exchange

Modrus Managed Exchange can be accessed from desktop or laptop computers using Microsoft Outlook®, while Outlook Web Access® provides secure access from any Internet browser. In addition the system supports numerous mobile phones / PDAs including iPhone, Blackberry & those running Windows Mobile®, all with full, automatic synchronisation.
