

Modrus has a deep understanding of Enterprise Networking, collectively having had many years of experience architecting, managing and supporting complex network environments. Modrus is a SonicWall firewall partner and has a number of SonicWall accredited technical staff within its team. Modrus is proud to have been awarded SonicWall's highest level of 'Gold Solution Provider' accreditation – one of only a handful of UK resellers to have achieved this.

Modrus recommends the following models of SonicWall firewall...

Model	Image	Interfaces	Certifications	Nodes Supported	Site-to-Site VPN Tunnels	Stateful Throughput	UTM Performance*
NSA 240		3 x GbE, 6 FE, USB	EAL4+, VPNC, ICSA Firewall 4.1	Unrestricted	25	600Mbps	25Mbps
NSA 2400		6 x 10/100/1000 Copper Gigabit Ports	EAL4+, VPNC, ICSA Firewall 4.1	Unrestricted	75	775Mbps	40Mbps
NSA 3500		6 x 10/100/1000 Copper Gigabit Ports	EAL4+, FIPS 140-2, VPNC, ICSA Firewall 4.1	Unrestricted	800	1.5Gbps	60Mbps
NSA 4500		6 x 10/100/1000 Copper Gigabit Ports	EAL4+, FIPS 140-2, VPNC, ICSA Firewall 4.1	Unrestricted	1500	2.75Gbps	150Mbps

The SonicWall NSA Series provides central sites and branch offices with application control, intrusion prevention and gateway anti-malware. As businesses depend more and more on the reliability of their networks, the importance of enterprise-class features such as advanced routing, stateful high-availability and high-speed VPN technology become vital. Offering a high-performance multi-core architecture, the NSA Series can be deployed in either a Next-Generation Firewall or UTM (Unified Threat Management) Firewall configuration.

* These figures represent approximately 25% of SonicWall's stated throughput for each device, however from our experience they more closely match throughputs achieved in real-world implementations.

SONICWALL®

GOLD SOLUTION PROVIDER

SonicWall Comprehensive Gateway Security Suite

Available on all models of SonicWall firewall, the Comprehensive Gateway Security Suite is a powerful security solution for businesses of all sizes, as it includes Gateway Anti-Virus, Anti-Spyware, Intrusion Prevention and Application Intelligence and Control Service; Content Filtering Service; ViewPoint Reporting Software and 24x7 technical support.

Gateway Security Services

SonicWall Gateway Anti-Virus, Anti-Spyware, Intrusion Prevention, and Application Intelligence and Control Service delivers intelligent, real-time network security protection against sophisticated application layer and content-based attacks, including viruses, spyware, worms, and more. Configurable tools prevent data leakage and enable visualisation of network traffic.

Content Filtering

SonicWall Content Filtering Service blocks multiple categories of objectionable Web content and provides the ideal combination of control and flexibility to ensure the highest levels of productivity and protection.

Viewpoint Reporting Software

ViewPoint software graphically illustrates network activity like bandwidth utilisation and observed threats, generating highly customisable, easy-to-read reports.

Support Services

SonicWall's Support Services are designed not only to keep your security infrastructure current, but also to react swiftly to any problem that may occur. However, that's not enough to keep your network safe these days. So our support services also include crucial updates and upgrades, the finest technical support, access to extensive electronic tools and timely hardware replacement.

Modrus Remote Management

Modrus Remote Management supplements SonicWall's services, providing complete peace of mind. Modrus proactively monitors your equipment 24/7 from its sophisticated operations centre. On many occasions this means that if an issue occurs, it is rectified before you are even aware of it. In addition, Modrus provides telephone helpdesk support during working hours to record, diagnose and troubleshoot technical faults and we remotely manage changes to the firewall rules, allowing or denying traffic to or from devices on your network.

Any Questions? Contact us before you embark on your next project. You will discover that we possess both the technical expertise and business savvy to ensure our solutions deliver the most powerful rewards to your organisation.
